Art Unit: 1657

The amendment received 12/7/2006 has been entered and claims 2, 27, 28 are currently pending in this application.

The amendments to abstract and specification are acceptable.

In view of the rewritten claims and applicant's arguments, the rejection under 35 U.S.C. § 102(b) is hereby withdrawn. A new rejection under 35 U.S.C. § 112 first paragraph is presented below.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2, 27, 28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims are directed to a method of screening for therapeutic agents useful in the treatment of the cardiovascular disease and many other diseases as newly amended. The specification as originally filed does not provide support for

Art Unit: 1657

the claimed method because it does not disclose any agent found by the screening method, does not show any agent administered for any function, and provides no nexus between activity of PDE10A and any cardiovascular condition (or any other diseases as claimed). A reading of the specification fails to provide written description for any result of the screening method. A broad list of classes of disorders is contemplated by the specification in several places but no specifics are found in the specification.

### **Conclusion**

No claim is allowed.
